If you're now racing around like photon in a fibre-optic cable, this worn-out old Dad joke may help you change gears in the lap.

"A photon checks into a hotel when the bellhop asks, 'Would you like help with your luggage?' The photon replies, "I don't have any. I always travel light."

Feel free to interact. My curiosity about this technological surge from the 1850's started in my High School days of the early 1970's.
